

I am a proficient professional in the technology industry who has completed my Master of Science in Blockchain and Digital Currencies, and I am currently a PhD student in Blockchain adoption. I am competent in efficiently managing complex systems and services with vast experience within the technology sector spanning over 12 years. Within the past decade I have shown a keen interest in transitioning my career towards the Blockchain and Crypto ecosystem. I have made tremendous strides towards acquiring adequate levels of knowledge in related topics, and I am now ready to actively participate in contributing towards building the next generation of Web3.0 technologies.

My technical expertise, and strong operational and strategic abilities is backed up by my strong academic foundation. I believe in continuous learning and growth, having completed three University degrees and I am currently studying towards my fourth. I have excellent verbal and written communication skills, and I have built up strong interpersonal relationships and stakeholder management skills. I have an extremely diverse set of skills covering key disciplines to successfully drive organisational growth and develop innovative business solutions.

I live in the Isle of Man, and I am eligible to work in the United Kingdom or remotely. I have excellent time management and organizational skills, and I am self-driven, I am extremely competent and capable of handling remote working opportunities, as I am always flexible with my time, and extremely conscious of applying myself to accomplish allocated tasks efficiently. I am a calm, collected, confident, sociable, articulate and well-presented individual with excellent interpersonal skills.

My background is firmly rooted in technology, offering a unique blend of technical and managerial expertise. My engineering background is in electronics and IT, and I have simultaneously progressed my leadership qualities through my management capabilities. I have been consistent in pursuing my passion of research by growing my knowledge in Blockchain related concepts.

I am well versed in understanding technical concepts. I am also extremely empathetic and have excellent situational awareness. My leadership attributes, coupled with my experienced background in the gaming industry, all solidified by my strong foundation of academic qualifications, has created confidence and self-belief that I am an excellent candidate with a prosperous career path ahead of me. I look forward to taking on a new roles in web3.0 and driving forward innovative new solutions.
